Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means are for the period to 1965. inclusive §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Po office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a, b, c, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation r corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precip tation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measu ment. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manill Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Irons Fo Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cas Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§The mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station.

CLIMATOLOGICAL DATA

ARKANSAS SECTION

H. S. COLE

ol. XLIV LITTLE ROCK, ARK., APRIL, 1939 No. 4

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for April, based on the reports of 73 ations, was 59.3°, which is 2.1° below the 49-year average. onthly means ranged from 53.6° at Lead Hill to 64.2° at agnolia. The highest temperature during the month was 1° reported at Amity and Prescott on the 26th. The lowest mperature was 19° at Lead Hill on the 7th. Killing frost or eezing temperatures were recorded at most northern and west- n stations on the 7th. The greatest daily range was 51° at ilbert on the 9th.

The average precipitation for 109 stations was 7.13 inches, hich is 2.29 inches above the 49-year average. Monthly nounts ranged from 2.89 inches at Crossett to 13.42 inches Pine Ridge. Amounts exceeding 10 inches were recorded er the west-central section of the State. The greatest amount corded in any 24-hour period was 8.25 inches at Mountain alley in Garland County on the 16th. The average number days with 0.01 or more was 8. A trace of snowfall was re- rded at a few northwestern stations.

Ten tornadoes occurred this month. Thirty people were lled and 100 or more injured. Property damage was esti- ated at $116,400. Heavy hail this month damaged proper- estimated at $36,000.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means are for the period to 1935, inclusive §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ᵃ,ᵇ,ᶜ, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation re corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precipi tation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measure ment. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla Boughton, Route 4, Prescott; Devils Knob, Salus: Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana: Irons Fork, Irons For Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon: Springbank, Doddridge; Turnpike, Dover: White Rock, Cass Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Ther mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station.

Vol. XLIV   Little Rock, Ark., May, 1939   No. 5

Price: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for the month, based on the reports of 73 stations, was 69.4° which is 0.2° above the 49-year average. Monthly means ranged from 62.7° at Lead Hill to 74.4° at Texarkana. The highest temperature during the month was 96° recorded at Camden on the 22d and at Waldron on the 24th. The lowest temperature was 34° recorded at Lead Hill and Thornburg on the 3rd. The greatest daily range was 50° at Mount Ida on the 5th.

The average precipitation for 110 stations was 4.85 inches, which is 0.13 inch below the 49-year average. Monthly amounts ranged from 0.35 inch at Index to 11.17 inches at Eureka Springs. Precipitation was below normal over the west-central and southwestern counties, and at a few stations in the east-central portion of the State. The greatest amount in any 24-hour period was 3.67 inches recorded at Bentonville on the 12th and 13th. The average number of days with 0.01 inch or more was 10.

Windstorms and heavy hail caused considerable damage during May. The damage to crops was estimated at $259,000 and to property $431,000. Most of this damage occurred on the 22d when straight-line winds swept over Pulaski, Lonoke and Jefferson counties.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means are for the period to 1935, inclusive §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ᵃ,ᵇ,ᶜ, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. ¹ Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. ²Precipitation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5,Texarkana; Irons Fork, Irons For Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mountain, Norman.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station.

CLIMATOLOGICAL DATA

ARKANSAS SECTION

H. S. COLE

Vol. XLIV Little Rock, Ark., June, 1939 No. 6

Price: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for June, based on the reports of 73 stations, was 77.9° which is 0.7° above the 49-year average. Monthly means ranged from 82.9° at Texarkana to 72.6° at Turnpike. The highest temperature during the month was 100° at Texarkana on the 8th and 9th. The lowest was 49° reported on the 11th at Gravette and Irons Fork. The greatest daily range was 37° reported at Thornburg on the 8th and Irons Fork on the 11th.

The average precipitation for 111 stations was 4.50 inches, which is 0.44 inch above the 49-year average. Rainfall was frequent during the month with 16 stations recording 15 or more rainy days. The monthly amounts ranged from 1.45 inches at Camden to 10.59 inches at Monticello. Monthly amounts of less than 2 inches were reported in Ashley, Howard, Lawrence, Miller, Ouachita, Randolph and Union counties. Amounts of 8 inches or more were recorded in Arkansas, Benton, Drew, Franklin, Independence, Jefferson and Johnson counties. The greatest amount recorded in any 24-hour period was 4.50 inches at Batesville on the 28th.

Two earthquake tremors were reported during the month. One on June 1st was reported in the extreme southwestern portion of the State. The other on June 19th was reported at scattered stations over the southern half of the State. No damage was reported.

O.D.N.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means are for the period to 1935, inclusive. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation re corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precipi tation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measure ment. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Irons For Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mountain, Norman.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated ***Midnight to midnight. §§Ther mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station.

OL. XLIV LITTLE ROCK, ARK., JULY, 1939 No. 7

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

Mean temperatures this month based on reports of 70 sta- ons was 82.0°, which is 1.5° above the 49-year average. onthly means ranged from 78.2° at Turnpike to 86.5° at exarkana. Temperatures were high during the second and ird week of the month, the highest recorded being 110° at oneville and Texarkana on the 22d. The lowest tempera- re recorded was 55° at Corning on the 30th and at Lead Hill the 30th and 31st. The greatest daily range was 45° re- rded at Mt. Ida on the 7th.

The average precipitation for 110 stations was 3.34 inches hich is 0.45 inch below the 49-year average. Monthly a- ounts ranged from 0.34 inch at Gravette to 9.67 inches at Dorado. Little or no rainfall was reported during the cond and third weeks of the month. Four stations reported inches or more during the month, while 7 stations in the estern portion of the State reported less than an inch. Six ations reported ten or more rainy days, the average being 7 ys. The greatest amount recorded in any 24-hour period as 4.03 inches at El Dorado on the 24th.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 1 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means are for the period to 1935, inclusive §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a, b, c, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Irons Fork Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mt., Norman, Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station.

CLIMATOLOGICAL DATA

ARKANSAS SECTION

H. S. COLE

Vol. XLIV LITTLE ROCK, ARK., AUGUST, 1939 No. 8

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for the State, based on the reports of 71 stations, was 80.2°, which is 0.1° above the 49-year average. Mean temperatures ranged from 75.4° at Turnpike to 85.6° at Texarkana. The highest temperatures were reported over the southwestern portion of the State with 107° at Texarkana on the 17th and 31st. The lowest temperature during the month was 49° at Lead Hill on the 21st. The greatest daily range was 44° at Gravette on the 4th.

The average precipitation, based on the reports of 108 stations, was 2.50 inches, which is 1.03 inches below the 49-year average. Monthly amouuts ranged from 0.27 inch at Index to 6.84 inches at Mt. Ida. Sixteen stations reported rainfall amounts less than an inch, while 17 stations recorded amounts of 4 inches or more. The greatest amount for any 24-hour period was 4.32 inches at Mt. Ida on the 9th. The average number of rainy days was 6.

An aurora borealis was observed at six stations on the 11th. Thunderstorms were recorded on 26 days.

O.D.N.

ARKANSAS SECTION

O. D. NEUMANN

Vol. XLIV   Little Rock, Ark., September, 1939   No. 9

GENERAL SUMMARY

The mean temperature for the State, based on the records of 0 stations, was 79.9°, which is 5.4° above the 49-year averge. This was the second warmest September on record, the ecord being 80.5° in 1925. Monthly means ranged from 6.0° at Paragould to 83.4° at Fort Smith. Maximum temeratures were high most of the month, the highest recorded eing 112° at Booneville on the 4th. The record for Septemer is 113° recorded at Helena on the 6th, 1925. The lowest emperature during the month was 35°, recorded at Lead Hill n the 30th. The greatest daily range was 52° at Corning on ne 23d.

The average precipitation, as determined from the records of 8 stations, was 1.77 inches, which is 1.57 inches below the -year average. Monthly amounts ranged from 0.11 inch at rannis to 5.43 at Lutherville. The greatest amount recorded any 24-hour period was 5.43 inches at Lutherville on the th.

The weather was favorable for cotton during the month due the high temperatures and very little rainfall. The bolls ened rapidly in most portions, and at the close of the month e crop was 50% to 90% picked, except in the northeastern rtion. The weather was very favorable for the harvesting of rly corn and rice, but unfavorable for late corn, meadows, stures. potatoes, truck and gardens. Water for stock was ported scarce in most western and some northern counties e latter part of the month.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means are for the period to 1935, inclusive. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation re corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation is measured in the morning; amount then recorded is for the preceding 24 hours. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Irons Fork Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mt., Norman, Mulberry, R 1, Mulberry;

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

ARKANSAS SECTION

O. D. NEUMANN

Vol. XLIV   Little Rock, Ark., October, 1939   No. 10

Price: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for October, based on the records of 71 stations, was 65.2°, which is 2.5° above the 49-year average. Monthly means ranged from 61.5° at Lead Hill to 69.7° at Texarkana. Highest temperatures were recorded at most staions on the 7th or the 23d, the highest being 98° at Conway on the 23d. The lowest temperatures were recorded on the ast day of the month, and were freezing or lower over most of he State. The lowest reported was 20° at Lead Hill and Thornburg. The greatest daily range was 55° at Lead Hill on he 23d.

Drought conditions prevailed during the month. The average precipitation as determined from the records of 112 stations, was 1.71 inches, which is 1.42 inches below the 49-year average. Monthly amounts ranged from no rainfall at Plantersville to .48 inches at Eureka Springs. The greatest 24-hour amount was 4.90 inches at Corning on the 7th.

The dry, warm weather during the month was favorable for cotton, and good to excellent progress was made in picking and ginning. At the close of the month the cotton crop was from 85% to 95% harvested over the northeastern and eastern counties; practically completed elsewhere. The weather was also favorable for gathering corn, rice and soy beans, but unfavorable for meadows, pastures and ranges, gardens and truck. Very little plowing and planting of winter grains was done due o the dry soil. Many stations reported their first killing frost or this season on the 31st.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations havi or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year peri for stations with 10 to 14 years the means are for the period to 1935, inclusive. §Also on other dates. **Not used in means and summaries. ‡‡Evaporation station. †P office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated. observations are generally made late in the afternoon, near sunset, and precipitation r corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station: precipitation is for the 24-hour period, midnight to midnight. [2]Preci tation is measured in the morning; amount then recorded is for the preceding 24 hours ‡Precipitation measured with recording gage. *Included in the next measu ment. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manil Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock. Index, Route 5,Texarkana; Irons Fork, Irons Fo Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Ca Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mt., Norman, Mulberry, R 1, Mulberr

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§The mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

O. D. NEUMANN

VOL. XLIV LITTLE ROCK, ARK., NOVEMBER, 1939 No. 11

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The average temperature for the month, based on the reports of 71 stations, was 48.8°, which is 2.5° below the 49-year average. Monthly means ranged from 42.5° at Lead Hill to 54.2° at El Dorado. Temperatures averaged above the normal from the 7th to the 10th and from the 16th to the 20th. The highest temperature recorded during the month was 87° at Camden on the 8th and at Dumas on the 9th. The lowest temperature was 14° at Gilbert on the 28th and at Thornburg on the 5th. The greatest daily range was 56° reported at Thornburg on the 14th.

The average precipitation for the month, based on the reports of 109 stations, was 3.39 inches, which is 0.35 inch below the 49-year average. Rainfall was above the average at most southwestern stations and several northwestern stations; below elsewhere. Nearly all the precipitation during the month occurred during the period from the 10th to the 19th and on the 30th. Monthly amounts ranged from 0.98 inch at Blytheville to 6.81 inches at Texarkana. The greatest amount recorded in any 24-hour period was 3.60 inches at Fulton on the 18th. Snowfall was reported on the 2d in the northwestern corner of the State Bentonville reported 2.4 inches, Gravette and Eureka Springs 2.0 inches and a half inch at Rogers and Fayetteville. The average number of days with 0.01 inch precipitation was 7.

The first killing frost of the season was reported by many stations on the 4th and 5th. The length of the growing season for scattered stations over the State were as follows: Bentonville, 227 days; Batesville Airway, 207 days; Corning, 202 days; Blytheville, 186 days; Fort Smith, 211 days; Little Rock Airway, 229 days; Marianna, 234 days; Hope, 226 days; and Portland, 224 days.

The small amount of cotton and corn that was still in the fields at the beginning of the month was gathered early in the month. Other out-of-door farm activities were plowing, planting of winter grains, clearing fields, butchering, repairing or building fences and cutting wood for fuel. Indoor feeding for stock was necessary as there was very little grazing.

PRESSURE, WIND, HUMIDITY, AND SUNSHINE

Death of Carl A. Starck

Mr. Carl A. Starck, who was our cooperative observer at Rogers continuously for 44 years, passed away early on the morning of November 7th, 1939, at the age of 81 years. He served without compensation, merely for the love of the work and the satisfaction of contributing to the welfare of his fellow men. His work was excellent throughout.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations havi or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year peri for stations with 10 to 14 years the means are for the period to 1935, inclusive §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Po office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ᵃ,ᵇ,ᶜ, number of days missing

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation r corded is for the 24 hours ending at time of observation. [1] Weather Bureau Station: precipitation is for the 24-hour period, midnight to midnight. [2]Precip tation is measured in the morning: amount then recorded is for the preceding 24 hours ‡Precipitation measured with recording gage. *Included in the next measu ment. T. Trace, or precipitation less than 0.01 inch ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manill Boughton, Route 4, Prescott; Devils Knob, Salus: Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock, Index, Route 5, Texarkana; Irons Fork, Irons Fo Experiment Forest, Mena; Lutherville, Route 1, Lamar· Rogers, Route 3, Rogers; Rosebud, Route 2, Mt Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cas Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; High Peak Mt., Norman, Mulberry, R 1, Mulberr

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§The mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLIV Little Rock, Ark., December, 1939 No. 12

Price: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

Average temperature for December, based on the reports of 72 stations, was 45.5°, which is 2.7° above the 49-year average. Monthly means ranged from 40.4° at Lead Hill to 51.9° at Texarkana. Temperatures were above the average from the 1st to the 20th, below the rest of the month. The highest temperature occurred on the 7th with 84° recorded at Dumas, Oden, Pine Bluff and Texarkana. The lowest for the month was 5° recorded at Lead Hill on the 29th.

The average precipitation for the month, according to the reports of 109 stations was 2.46 inches which is 1.76 inches below the 49-year average. The heaviest amounts were reported in the lowlands and especially over the southeastern counties. The greatest monthly total was 5.53 inches at Crossett, while the least was 0.81 inch at Hot Springs. The greatest 24-hour amount was 3.09 inches at Lutherville. The average number of days with 0.01 inch precipitation was five. Snow was reported on the 26th over the highland counties and the northeastern part of the State, with 2.5 inches average for the highlands and 1.4 inches average for the State. Devils Knob reported 7 inches of snow and Eureka Springs, Harrison, Cotter and Mammoth Spring reported 6 inches. Snow remained on the ground for several days and was favorable for winter grains and winter truck.

O.D.N.

PRESSURE, WIND, HUMIDITY, AND SUNSHINE

Station	Atmospheric pressure (reduced to sea-level)					Wind				Relative humidity			Percentage of sunshine

Corrections for November, 1939

DeQueen, greatest precipitation in 24 hours should be 1.65 inches. Fayetteville. and Fayetteville Exp., prevailing wind direction "N". Green Mountain, mean minimum, 37.4; mean temperature 46.8°. Marianna, mean minimum 39.1; mean temperature 50.2°. Morrilton, Portland and Waldron, wind direction should be NW.

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLIV LITTLE ROCK, ARK., YEAR, 1939 NO. 13

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

Temperatures were above the 35-year normal every month except April and November. The mean of 62.7° was 1.2° above the 49-year average. The highest annual mean was 67.6° at Texarkana, while the lowest mean was 57.8° at Lead Hill. The highest temperature during the year was 112° at Booneville on September 4th. This reading was one degree below the September record established at Helena in 1925. The lowest temperature was 4°, recorded at Mammoth Spring on February 4th. January and September were unusually warm. The mean of 79.9° in September was exceeded only once in September records, the record being 80.5° in September, 1925.

Monthly precipitation averages were above the 35-year normal in January, February, April and June. The average for the year was 50.16 inches, which is 1.91 inches above the 49-year average. The greatest annual amount was 66.68 inches at Pine Bluff while the least annual amount was 33.26 inches recorded at Fort Smith. The greatest monthly amount was 16.69 inches recorded at Pine Bluff in February, while the least monthly amount was 0.00 at Plantersville for October. February and June were noted for frequent rainy days. The average of 12 rainy days in February was a record for that month. Snowfall for the year averaged 5.1 inches. Heavy rains were reported on the evening of April 15th and all day of the 16th, over the northern and central counties, being excessive over west-central counties. Mountain Valley reported 8.25 inches for 24 hours, ending at 6 p. m. on the 16th, the greatest for the year. Danville reported 10.04 inches in less than 48 hours; Dardanelle 8.40 inches; Booneville 8.08; Ozark 4.57; Jessieville 7.60; Story 7.82 and Oden 8.22 during the same period. This downpour caused a record stage on the Petit Jean River at Danville of 31.8 feet on April 17th, causing flood losses estimated at $24,000. During this rainstorm the dam of the city of Paris waterworks washed out, with an estimated loss of $35,000

The drought condition which prevailed during September and October was decidedly unfavorable for vegetation, especially late corn, meadows, pastures, potatoes and truck. The scarcity of water for stock became quite a problem in most western and some northern counties during this period.

Seventeen tornadoes on 6 different days took a toll of 31 lives, injured 124, and caused property losses estimated at $294,900. High winds were reported on 20 days. A windstorm with near tornadic force on May 22d, that swept over Pulaski, Lonoke and Jefferson counties caused damages estimated at $550,000. Three people were killed and 19 injured during the storm. Total losses for the year were $1,687,250. Heavy hail was reported on 12 days, with losses estimated at $84,200. Lightning killed 9 persons during the year and caused property losses of $15,214.

The last killing frost in spring was recorded at most stations on April 7th, while the first killing frost in fall was noted on October 31st, a total of 207 growing days. The length of growing season for all stations averaged 212 days.

O.D.N.

FLOODS IN 1939

On the Arkansas

No floods were reported on the Arkansas River during 1939, but one of its tributaries, the Petit Jean, had a record flood. Danville reported 31.8 feet on April 17th as a result of excessive rainfall that totaled 10.04 inches at Danville in less than 48 hours (16th and 17th). Dardanelle reported 8.40 inches, Booneville 8.08 inches, Ozark 4.57 inches, Story 7,82 inches and Subiaco 6.25 inches during the same period. Former record at Danville was 30.0 feet on June 18, 1935. Flood stages at Danville were reported from February 20th to March 2d, March 6th to 8th, April 7th to 9th and 16th to 21st. Flood losses on the Petit Jean totaled approximately $24,450.

On the White

The White River was high during April, May and the first part of June. Flood stages at Calico Rock were recorded on April 17th, 18th and May 27th. The highest stage for the year was 30.5 on April 17th. Batesville had flood stages on February 21st, March 6th, April 17th to 21st, and May 28th and 29th, with the highest stage of 33.3 recorded on April 18th. Newport recorded flood stages March 7th and April 18th to 24th. Highest at this station was 30.3 feet on April 19th. Georgetown had flood stages from February 3d to March 26th, April 18th to May 8th and from May 20th to June 7th, with the highest stage, 27 feet, recorded on April 24th. Clarendon flood stages were as follows: February 5th to April 3d; Apri 17th to May 15th, May 26th to June 13th. The highest recorded there was 30.7 feet, April 28th, 29th and 30th. Floo stages at St. Charles were as follows: February 8th to Apr 9th, April 17th to May 18th, May 31st to June 15th. Highes stage recorded was 29 feet on May 2d. The following station located on tributaries of the White River had flood stages during the year: Black Rock on the Black River January 31st t March 24th; April 7th to 12th; April 17th to May 6th. Highest stage was 24.8 feet April 18th. Judsonia recorded floo stages on February 1st, 3d and 27th and March 12th. This station was closed March 31st, 1939. Highest stage for Judsoni during first three months was 31.1 feet March 12th. Floo losses in the White River Basin were estimated at $8,158.

On the Ouachita

Arkadelphia had flood stages February 3d, 4th, 26th t 28th; April 6th to 8th, 17th to 20th. Highest stage recorde was 28.2 feet April 17th. Camden reported flood stages fro February 4th to March 9th, March 31st to April 5th, Apr 7th to 16th, and 18th to 27th. Highest stage was 37.6 fee April 21st. Boughton on the Little Missouri reported floo stages on February 5th, 16th, 27th, and April 19th, the highest being 21.3 feet on April 18th. Losses in the Ouachita Rive basin amounted to $22,200.

Departures from normal temperature are computed from averages of entire period for stations having 10 or more years record. Departures of precipitation with 15 years or more record are computed from a normal or "standard mean", adjusted to a uniform 35-year period; for stations with 10 to 14 years the means are for the period to 1935, inclusive. T., less than 0.01 inch rain or melted snow. Reference letters ^{a}, ^{b}, ^{c}, appearing in the table indicate number of days missing: † Also on later dates. **Also later months. ‡‡Post-office addresses of these stations as follows:-Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott; Devils Knob, Salus; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Lutherville, Route 1, Lamar; Rock Springs, Route 2, Wilmar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mount Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Hankins, Montongo, Plantersville, Ross and Underwood, Soil Conservation Service, Monticello.

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLV LITTLE ROCK, ARK., JANUARY, 1940 No. 1

PRICE: 25 Cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for January was 28.0°, which is 13.2° below the 50-year average. This was the second coldest January on record, the record being 27.3° in January, 1918. Monthly means ranged from 19.7° at Gravette to 36.0° at Texarkana. The Highest temperature for the month was 74° at Magnolia on the 11th, while the lowest was —14° at White Rock on the 19th. Minimum temperatures of zero or lower were reported over the entire State except at a few stations in the extreme southern portion of the State where they were slightly above zero. Minimum readings on the 19th were the lowest in the State since 1930 when all stations had below zero readings. The greatest daily range was 50° at Fordyce on the 16th.

The average precipitation, based on the reports of 110 stations, was 1.56 inches, which was 2.86 inches below the 50-year average. Monthly amounts ranged from 0.64 inch at Warren to 4.62 inches at St. Francis. The greatest amount recorded in any 24-hour period was 2.01 inches at Blytheville on the 14th. Snow covered the entire State for part of the month. It averaged 5.9 inches, and was the third greatest average in January records, being exceeded in 1918 with 17.6 inches and in 1895 with 7.0 inches. The greatest monthly total snowfall was 13.9 inches at White Rock in Franklin County.

The cold weather during the month materially damaged oats, and slightly damaged peaches in the northwestern portion of the State. The deficiency in precipitation for December and January has greatly depleted sub-soil moisture.

Rivers were at low stages all month. The Arkansas River was frozen over completely at Little Rock from the 20th to the 28th.

O.D.N.

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLV   Little Rock, Ark., February, 1940   No. 2

Price: 25 Cents per ear (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

February temperatures, while still somewhat below normal, were considerably higher than those recorded during January. The mean for 70 stations was 41.9° which is 1.7° below the 50-year average. Monthly means ranged from 48.0° at Magnolia and Texarkana to 36.3° at Devils Knob, a difference of 11.7° between the Ozarks and southwestern sections of the State. Means were normal or below at all stations except Corning, Rogers and Russellville. Extremes ranged from 10° at Lead Hill on the 14th to 88° at Arkadelphia on the 29th. The lowest occurred in most localities about the 1st or the 14th and the highest generally on the 28th or 29th. All temperatures were well within the limits established by previous records. The greatest daily temperature range was 54°, from 70° to 16°, and occurred at Mountain Home on the 13th.

The average precipitation for 108 stations was 3.31 inches which is only 0.11 inch below the 50-year average. Monthly totals ranged from 0.84 inch at Mountain Home to 6.19 inches at Wynne. Of the stations for which normals have been computed 31 showed positive departures, 43 negative. The greatest 24-hour amount was 2.63 inches at St. Francis on the 8th. Snowfall ranged from 13.2 inches at Devils Knob to none in extreme southern counties, the average of 82 stations being 3.2 inches. Snow covered the ground several days in a few localities in the mountains while in southern counties most of it melted as it fell.

The weather the first half of the month was unfavorable for outdoor activities, but during the latter half more favorable conditions prevailed and considerable plowing and early planting was done. Orchards were pruned, sprayed and cultivated. The peach crop was not greatly reduced by the cold weather of January. The top soil is generally in good condition while the subsoil remains dry, especially in upland sections of the State. No destructive windstorms were reported. All streams continued at low stages.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period: for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a, b, c, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Weather Bureau Station: precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation is measured in the morning; amount then recorded is for the preceding 24 hours ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla, Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2 Mt Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Haukins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLV LITTLE ROCK, ARK., MARCH, 1940 No. 3

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

March, 1940, was the third consecutive month with a monthy mean temperature below normal and the ninth consecutive month with precipitation below normal. The cool weather was favorable in that it retarded the development of fruit buds, but the delayed growth of meadows and pastures necessitated a longer feeding period for stock. The close of the month found arming operations and the season somewhat behind normal advancement.

The mean temperature for the month, as determined from he records of 72 stations was 52.0° which is 0.7° below the 50-year average. Monthly means ranged from 57.6° at Prescott to 44.4° at Lead Hill, a difference of 13.2° between the Ozarks in the northwest and southern sections of the State. Of he stations for which normals have been computed, all except 18 showed negative departures for the month. The highest emperature recorded was 88° at Conway and Dardanelle on the 31st, the lowest 9° at Lead Hill on the 25th. The highest occurred in practically all localities on the 31st while the lowest occurred on different dates, but in all instances during the latter half of the month. The greatest daily temperature range was 59°, from 73° to 14°, and occurred at Gilbert on the 15th.

The average precipitation for 111 stations was 2.39 inches which is 2.27 inches below the 50-year average. Monthly toals ranged from 5.44 inches at Arkansas City to 0.78 inch at Oden, all stations except Arkansas City showing negative departures. Showers occurred in most sections of the State on the 7th, 8th, 11th and 13th and after the 22d showers were of frequent occurrence. The greatest amount recorded in any 24-hour period was 3.25 inches at Arkansas City on the 13th. The average number of rainy days was 7. About 38 stations in the northern counties reported snowfall ranging from a trace at several stations to 8.2 inches at Saint Francis. Snowfall was heaviest in the northeastern counties.

Lightning damage occurred at Harrison, Little Rock and Appleton, but losses were not extensive. Heavy hail did some ocal damage in Carroll and Benton counties on the 28th and a wind storm on the 28th broke plate glass windows in the business section of Harrison.

Climatological Data: Arkansas Section

Corrections for December, 1939

Camden, greatest precipitation in 24 hours 1,74 inches. Conway, number of clear days 18, cloudy 9. Ft.
Smith, total snowfall 2.7 inches. Gravette, total precipitation, 2.21 inches; departure −0.20: total snow-
fall 3.0; days with 0.01 inch or more precipitation 5. High Peak, wind direction NW. Hot Springs, days
with 0.01 inch or more precipitation 9. Lutherville, mean temperature 45.5°; departure +4.1. Mammoth
Spring, total precipitation 2.06; departure −1.32; greatest precipitation in 24 hours 0.61 inch. Marked
Tree, no rainfall 31st, total precipitation for month 2.97 inches, departure −1.67; total snowfall T., days
with 0.01 or more precipitation 7. Mount Ida, greatest daily range 55°. Rosebud, rainy days 3. Russell-
ville, total precipitation 2.00 inches; departure −1.01.

Corrections for January, 1940

Devils Knob, highest temperature on 17th. Dumas, days with precipitation 0.01 inch or more 8. Gran-
nis, total snowfall 3.7 inches. Fort Smith, minimum on 1st, 23°; on 3d, 23°; on 22d 14°; mean minimum
18.5°; barometric pressure, highest, sea level, 30.76. Highland, total precipitation 1.06 inches, departure
−3.52. Mammoth Spring, lowest temperature on the 19th. Marianna, total snowfall 3.6 inches. Marked
Tree, total snowfall 5.5 inches. Pine Bluff, total snowfall 3.7 inches. Waldron, total snowfall 7.8 inches.
Warren, mean temperature 33.4°.

Corrections for February, 1940

Camden, monthly mean temperature 46.0, departure −1.2. Devils Knob, monthly mean temperature
36 4°. Gilbert, maximum temperature 29th, 74°; mean maximum 48.7°. Gravette, highest temperature
74° on 29th. Jonesboro, lowest temperature 20° on 3d. Mammoth Spring, total snowfall 3.0 inches.
Oden, number clear days 7^{b}, partly cloudy 6^{b}, cloudy 14^{b}; days with 0.01 inch or more precipitation, 11;
lowest temperature 18° on 14th. Rogers, mean monthly temperature 39.0°; departure −0.5. St. Charles,
highest temperature on 26§. Subiaco, lowest temperature on the 14§. Thornburg, lowest temperature
13° on the 14th.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 1 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Weather Bureau Station; precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation is measured in the morning; amount then recorded is for the preceding 24 hours ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla, Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana; Irons Fork Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

CLIMATOLOGICAL DATA

3 ARKANSAS SECTION

WALTER C. HICKMON

ol. XLV   Littlf Rock, Ark., April, 1940   No. 4

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for April was 59.9°, which is 1.5° elow the 50-year average. This was the fourth consecutive ionth with temperatures below normal. The monthly means inged from 55.0° at Lead Hill to 64.7° at Texarkana and El orado. The highest temperature during the month was 95° t Mountain Home on the 1st, while the lowest was 18° at evils Knob and White Rock on the 12th. The minimum mperatures on the 12th and 13th were the lowest for April nce 1926. The greatest daily range was 57° at Gilbert on the 4th.

The average precipitation for 112 stations was 6.93 inches, hich was 2.04 inches above the 50-year average. This was ie first month with rainfall above normal since June, 1939. he greatest monthly total was 10.74 inches at Portland, while ie least was 4.28 inches at Black Rock. All stations with 35-ear normals, except Clarendon and Wilson, showed positive epartures. Precipitation periods were frequent during the ionth with an average of 10 days with 0.01 or more rainfall. he greatest amount for any 24-hour period was 4.65 inches at ortland on the 7th.

The cool, wet weather delayed farm activity throughout the tate. The freezing weather the middle of the month was unsual for so late in the season. Moderate frost damage was istained by peaches and apples. Cotton that was up, tomaes and all tender vegetation were killed and replanting was ecessary. At the end of the month potatoes made rapid revery from the freezing weather, strawberries were blooming ut ripening slowly, and oats, meadows and pastures made ood progress. Wells and reservoirs were replenished by the equent rains.

The White and Black rivers were high during the month. n the White all stations below Cotter, except Newport, report- one or more days with flood stages. Estimates on flood loss were as follows: On the Black River $1,000. Upper White 10,000. Lower White River $500.

Heavy Hail: Fayetteville, 30th, 2:45 p. m. moved SE, idth of path 2 miles, loss $50.

Straight-line Wind: Reyburn, 30th, 5:55 p. m., moved E, idth of path 100 yds., property damaged, loss $450.

Tornado: Near Saline-Grant County line, Tull to Ico, 30th, p. m., moved E 15 miles, 440 yds. wide, 4 houses destroyed d other property damage. Killed 6, injured 9, crop loss 00, property loss $8000.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Precipitation is for the 24-hour period, midnight to midnight. [2] Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3] Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Hankins, Monticello, Montongo, Plantersville, Rock Springs, Ross and Underwood, Soil Conservation Service, Monticello; Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLV LITTLE ROCK, ARK., MAY, 1940 No. 5

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for May was 66.6°, which is 2.5° below the 50-year average. This was the fifth consecutive month with temperatures below the average. The monthly means ranged from 60.6° at Lead Hill to 70.2° at Magnolia and Prescott, a difference of 9.6° between the Ozarks and southern sections of the State. The highest temperature during the month was 94°, recorded at two stations on the 6th and 8th, while the lowest was 33°, recorded at two stations on the 2d. These extremes are well within the limits established by previous records. The greatest daily range was 51° at Ozark on the 5th.

The average precipitation, based on the reports of 105 stations, was 3.62 inches, which is 1.33 inches below the 50-year average. The monthly amounts ranged from 0.63 inch at Lead Hill to 11.51 inches at Grannis. Of the 75 stations for which 35-year normals have been computed, only 12 showed positive departures. These 12 stations were scattered over the southwestern, the south-central, and a few eastern counties. Most of the rain fell in the form of scattered showers during the period from the 9th to the 29th. There was an average of 9 days with 0.01 inch or more rainfall. The greatest amount recorded for any 24-hour period was 4.45 inches at Grannis on the 18th.

Farm work and the progress of crops were generally retarded the first part of the month, but conditions improved the latter part. The night temperatures were too low for cotton and the stand was about two weeks later than usual. Cotton planting was about completed in all areas at the close of the month. Corn, oats and wheat made fair progress. At the close of the month wheat was heading well and near normal advancement. The crop needed additional moisture in north-central counties. Early oats was maturing and harvesting was about to begin in southern counties, but the crop was developing slowly in central and northern sections. Corn was generally late and stands were spotted. Rice planting progressed rapidly the latter part of the month and was nearly completed n some southern areas. Truck and garden crops made fair to good progress.

Flood stages continuing from April, were reported on the Ouachita, Black and the White River below Newport the first part of the month. The Little River was at flood stage during he last week of the month and the Red at Fulton rose to near flood stage at end of the month. The upper St. Franis was at flood stage the first week.

Tornado, 18th, at 6 p. m., rural area, 4 miles northwest of Bee Branch in Van Buren County, moved NE about 5 miles, width 1-4 mile. Several buildings were destroyed or badly amaged, and a forest observation tower blown over. No one was killed or injured. Loss was estimated at $5,000. Lighting caused a fire which destroyed an eight room brick consolidated school building at Roland, Pulaski County, at p. m., May 22, 1940. Loss estimated at $25,000.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period; for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries. ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a,b,c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:--Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station

CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLV Little Rock, Ark., June, 1940 No. 6

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for the month of June, based on the ecords of 72 stations, was 75.2°, which is 1.9° below the 50-ear average. This was the coldest June, for the State as a vhole, since 1935. At most southern stations it was the coldest June since 1928 and at Pine Bluff and Portland the coldest ince 1912. Monthly means ranged from 78.0° at El Dorado o 70.4° at Irons Fork, a difference of 7.6° between the Ouachita Mountain area and extreme southern sections of the State. Prescott's monthly mean was 77.7°; Magnolia's 77.6° nd Devils Knob's 70.9°. The highest temperature for the nonth was 98° at Harrison on the 27th. Blytheville, Dumas, England and Lead Hill reported 97° on either the 5th or the 7th. The lowest temperature recorded was 45° at Gilbert and ead Hill on the 1st. Irons Fork recorded 46° on the 25th. The greatest daily range was 42° at Gilbert on the 4th and at ead Hill on the 1st, Gilbert's range being from 50° to 92° nd Lead Hill's from 45° to 87°.

The average precipitation for 104 stations was 4.35 inches, vhich is 0.28 inch above the 50-year average. Monthly totals anged from 9.66 inches at Grannis in Polk County to 1.12 nches at Wilson in Mississippi County. De Queen's total, .55 inches, closely approximates that at Grannis. These stations are not more than 15 miles apart. Waldron, Scott Co., pproximately 50 miles north of Grannis had only 1.28 inches. This is another instance where Grannis, located on the windward side of the mountains, received copious rains while Waldron, on the leeward side, received a relatively light amount. The departure at Grannis was +4.64, at Waldron −3.34 inches. Rain was reported nearly every day during the period from the 5th to the 21st. Heavy amounts were reported in west-central portions on the 11th and in extreme southwestern portions on the 16th and 18th, slightly more than six inches being measured at De Queen and Grannis during the two days. Two or three inches fell at a number of southern stations on the 28th and 29th. The greatest amount for any 24-hour period was 4.16 inches at Russellville on the 11th. El Dorado reported 3.98 inches on the 29th.

The continued cool weather retarded advancement of most crops one to three weeks. Warm weather the first week of the month was very beneficial for cotton, while the cloudy, showery weather and cool nights the second and third weeks retarded growth and delayed cultivation. The heavy rains that occurred in a number of southern counties seriously damaged cotton and other crops. Corn made satisfactory growth during the month. Rains the latter part of the month interferred with the harvesting of wheat, oats, tomatoes and potatoes, but were beneficial for pastures, meadows, rice, truck and garden crops, except those areas where excessively heavy amounts occurred. The first shipment of early peaches was made about the middle of the month.

O.D.N.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 1 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perioc for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a,b,c, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. ¹Precipitation is for the 24-hour period, midnight to midnight. ²Precipitation measured in morning; amoun recorded is for the preceding 24 hours. ³Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation les than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Devil Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Rout 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass. Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. CLIMATOLOGICAL DATA

3 ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLV Little Rock, Ark., July, 1940 No. 7

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for the month of July, 1940, as determined from the records of 75 stations, was 78.4° which is 2.1° below the 50-year average. This was the lowest July mean since July, 1915, and is among the lowest of the last 50 years. July, 1915, with a monthly mean of 77.1°, July, 1904, with 77.9°, July, 1905 and July 1906, with 76.7°, and July, 1891, with 76.5° are the only cooler Julys on record in Arkansas. Monthly means ranged from 73.4° at Turnpike, northern Pope County, to 81.8° at Dardanelle, Yell County. All stations for which normals have been computed showed negative departures except Harrison and Gravette. Both of these stations had light rainfall. Extremes ranged from 103° at Harrison on the 29th and Subiaco on the 31st to 48° at Lead Hill on the 4th. The lowest occurred in most sections early in the month and the highest near the close of the month. Daily means were almost uniformly below normal during the first 21 days of the month, above the last decade. The greatest daily range was 39° at Thornburg on the 11th, from 57° to 96°.

The average precipitation for 107 stations was 4.14 inches which is 0.34 inch above the 50-year average. Monthly totals ranged from 14.79 inches at Warren to 0.35 inch at Cotter. Texarkana measured 14.41 inches, Index 13.95 inches, Fulton 12.71 inches. Monthly totals of ten inches or more occurred at ten stations, six in southwestern Arkansas, four in southeastern Arkansas. Monthly totals were less than an inch at fifteen stations, 14 in northern counties and at Waldron. This month Grannis, on the windward side of the mountains, had 10.75 inches while Waldron, 50 miles to the northward, but on the leeward side of the mountains, had only 0.92 inch. Mena, only 25 miles south of Waldron, had 7.00 inches. Torrential rains fell at several stations in southern and southwestern sections of the State on the 1st and 2d, Texarkana having 4.60 inches on the 1st, and 6.60 inches on the 2d, a total of 11.20 inches in less than 48 hours. Prescott, El Dorado, Camden, Monticello and Portland reported heavy totals these two days. While these totals are heavy, they do not establish a record, Arkadelphia having had 12.00 inches on June 28, 1905.

Showers were reported in the State every day during the first three weeks and temperatures being below normal, the weather was rather unfavorable for cotton. Fields became grassy, especially in southern sections of the State, and the crop suffered for lack of sunshine and warm weather. The last ten days were warm and dry, fields were cleaned, the crop made quick recovery and the close of the month found cotton blooming and fruiting satisfactorily. Boll weevil activity the first of the month was checked and by the close of the month the cotton crop was in good condition. Corn suffered from the dry weather in many localities in northern sections of the State, but in the remainder of the State corn made satisfactory progress and was generally in good condition at the close of the month. The heavy rains in the southern counties caused serious damage to truck crops and the quality of watermelons, tomatoes and cucumbers was impaired. A fair crop of peaches was harvested during the month.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means for the period of record are used §Also on other dates **Not used in means and summaries ‡‡Evaporation station. †Po office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ᵃ,ᵇ,ᶜ, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation r corded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning: amou recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage *Included in the next measurement. T. Trace, or precipitation le than 0.01 inch ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla Boughton, Route 4, Prescott; Clove Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana: Irons Fork, Experiment Forest, Men Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover White Rock, Cass. Mulberry, R 1, Mulberr

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated ***Midnight to midnight. §§The mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. ARKANSAS SECTION

WALTER C. HICKMON

oL. XLV LITTLE ROCK, ARK., AUGUST, 1940 No. 8

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, ashington D. C.

GENERAL SUMMARY

The mean temperature for August, based on the reports of 2 stations, was 77.7°, which it 2.4° below the 50-year average. f the stations for which 35-year normals have been computed, l except Corning had negative departures. This was the ldest August since 1931, when the mean was 76.7°. The onthly means ranged from 73.2° at Irons Fork and Turnpike 80.6° at Dardanelle. Temperatures were slightly above the ormal most of the first part of the month, below the latter alf. The minimum readings on the morning of the 21st were cceptionally low for this early in the season. The highest mperature during the month was 104° at Gravette, in Benton ounty, on the 3d. The lowest temperature reported was 45° the 21st at Irons Fork, in Polk County and Thornburg in erry County.

The average for June, July and August was 77.1°, which as the lowest average for this three-month period since 1920, hich also had an average of 77.1°. Since 1891 there have en only four years that had a lower average for these three onths: 1891, 76.9°; 1903, 76.3°; 1906, 76.9°; 1915, 75.9°. two other years there was the same average, 77.1°, in 1904 d 1920.

The average precipitation, based on the reports of 107 sta- ons, was 4.96 inches, which is 1.40 inches above the 50-year erage. This was the wettest August since 1927. Monthly nounts ranged from 2.13 inches at Des Arc and Nashville to 40 inches at Black Rock. The greatest 24-hour rainfall was 22 inches at Mountainburg on the 17th. The average num- er of days with 0.01 or more rainfall was 9.

The scattered showers the first week and general showers the cond week were very beneficial to growth of crops. In the orthern and northeastern sections crops had been suffering om the hot, dry weather and the soaking rains were particu- rly helpful in these areas in reviving corn and cotton. Tem- eratures were unseasonably low on the 20th, 21st and 22d r best growth of crops, but during that week weather was vorable for farm work, and harvesting of hay and fruit made od progress. Soil moisture was adequate for pastures and ll gardens during the month. A very good tomato crop was arvested in the northwestern counties, and the grape crop was out two-thirds harvested at the close of the month. The eather was favorable for the growth of rice, and at the close of e month the Early Prolific variety was heading nicely and in ry good condition. The planting of late potatoes and fall uck continued during the last week. The harvesting of aches in the Nashville-Highland area was completed the iddle of the month.

A severe thunderstorm was reported in the Fayetteville vi- nity on the 27th. Lightning struck several places, but did tle damage. Wind, during the storm, did slight damage to ple orchards, and blew down a few small chicken houses.

O.D.N.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena, Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass. Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in he morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

/OL. XLV LITTLE ROCK, ARK., SEPTEMBER, 1940 No. 9

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, /ashington D. C.

GENERAL SUMMARY

The mean temperature for September, average for 74 staions, was 71.2°, which is 3.2° below the 50-year average. All tations for which normals have been computed showed negaive departures for this month. Monthly means ranged from :7.4° at Irons Fork in Polk County to 75.2° at Texarkana in Iiller County. This was the coolest September since 1928 vhen the mean was 70.5°. In 1934 the mean temperature vas 71.3° or 0.1° higher than the past month. Temperatures vere above the normal the first nine days of the month and rom the 16th to the 24th, below during the remainder of the ime. Highest temperatures during the month were reported n the 1st, 2d, 8th and 9th, the highest being 100° at Conway n the 9th. Lowest temperatures during the month occurred n the 12th and 27th and on a few other dates, the lowest beng 31° at Gilbert on the 12th. Mount Ida and Thornburg reorted a minimum of 32°, Irons Fork had 33° and Lead Hill nd Rogers 34°. Light frost was reported at numerous westrn and northern stations during the two cold spells, but no amage occurred.

The average precipitation for 107 stations was 1.83 inches, vhich is 1.48 inches below the 50-year average. This was the hird September in succession with rainfall below the normal.)f the stations for which normals have been computed all had egative departures this month except the following: Bentonille, Dumas, El Dorado, England, Fayetteville Experiment tation and Helena. Precipitation was reported at scattered tations the first three days of the month, with heavy amounts eported at a few stations in the northwestern part of the State nd at Pine Bluff, El Dorado and St. Charles. Light to heavy ains were reported from the 23d to the 25th, several stations eporting from two to four inches during this period. Dumas ecorded 3.05 inches on the 24th and 1.30 inches on the 25th. 'ayetteville had 3.12 inches on the 25th, Stuttgart Experiment tation had 2.29 on the 25th and Monticello had 2.15 inches on he 24th. The monthly amounts ranged from 0.08 inch at Fulon in Hempstead County to 8.44 inches at Fayetteville in Washngton County. The greatest amount reported for any 24-hour eriod was 4.53 inches at Fayetteville on the 2d and 3d. The verage number of days with 0.01 inch or more was 4, which s 2 days below the 50-year average.

The cool, dry weather during September was favorable for ll harvesting operations, but was unfavorable for pastures, lanting of small grains and winter legumes, fall gardens and ruck patches. The growth of major crops was retarded by he periods of cool weather. Cotton made good progress the irst two weeks except in those sections that had heavy local ains early in the month. By the third week, cotton picking vas in progress in all sections of the State. Rains of the 23d o 25th retarded cotton harvesting several days. Gathering of arly corn continued during the month with good yields. Late orn had matured over the greater part of the State by the lose of the month. The cutting and harvesting of rice progressed well over the southern portion of the belt but the crop ipened slowly over the northern portion.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries. ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a, b, c, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Precipitation is for the 24-hour period, midnight to midnight. [2] Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3] Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena, Lutherville, Route 1, Lamar; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass. Mulberry, R 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLV Little Rock, Ark., October, 1940 No. 10

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The mean temperature for October, based on the reports of 73 stations, was 65.1°, which is 2.4° above the 50-year average. Temperatures were low the middle of the month but normal or above the rest of the month. This was the first month this year with the mean temperature above the normal. Monthly means ranged from 58.2° at Lead Hill in Boone Co., to 69.8° at Texarkana, in Miller County. The highest temperature during the month was 95° recorded at Mount Ida, in Montgomery County, on the 19th. The lowest reading was 29° at Gilbert on the 16th and 17th and at Mount Ida on the 16th. The greatest daily range was 54° at Okay on the 18th. Light frost was reported at most stations on the 16th and 17th, but no damage was noted.

The average precipitation for the 107 stations reporting was 1.91 inches, which is 1.19 inches below the 50-year average. Monthly totals ranged from 0.45 inch at Corning, in Clay Co., to 3.77 inches at Grannis in Polk Co. Rainfall was reported generally on the 6th, 14th, 27th, 28th and 31st, or an average of five days. The greatest 24-hour amount was 2.89 inches recorded at Stuttgart Experiment Station in Arkansas County on the 28th.

The month as a whole was favorable for harvesting operations. Rainfall was inadequate in many areas, especially the northern section, for fall-planted crops. The dry weather hastened the maturity of all fall crops. The picking of cotton which had been two weeks behind the normal seasonal advancement, was nearly completed during the month, except in the extreme eastern section. The late cotton has been maturing rapidly in northern and eastern areas. Late corn was nearly matured at the end of the month in northern sections and the danger of frost damage past. Gathering of corn continued but there was some delay in the eastern sections due to the urgency of cotton picking. The harvesting of rice made excellent progress.

The average number of clear days was 20, partly cloudy days 7, and cloudy days 4. Sunshine for the month averaged about 80%.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena, Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

WALTER C. HICKMON

ol. XLV   Little Rock, Ark., November, 1940   No. 11

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, ashington D. C.

GENERAL SUMMARY

The mean temperature for November, based on the reports f 76 stations, was 49.3°, which is 2.0° below the 50-year averge. All stations for which 35-year normals have been comuted showed negative departures except Camden, where the eparture was +0.3°. The monthly means ranged from 43.6° t Gravette to 54.8° at El Dorado. The highest temperature or the month occurred on the 2d at most stations, the highest eing 82° at Camden, Mountain Home and Texarkana. Lowst readings were reported on the 15th over the State, the lowst being 3° at Gilbert. Other low temperatures were as folows: Lead Hill, 4°; Gravette, 5°; Irons Fork, Rogers and hornburg, 6°; Eureka Springs and Turnpike, 7°; Bentonville, evils Knob and Mt. Ida, 8°. The greatest daily range was 3° at Mt. Ida and Gilbert on the 17th.

The average precipitation for 107 stations was 5.92 inches, hich is 2.14 inches above the 50-year average. Rainfall was bove the normal over most of the State except at a few staons in the extreme east and northeast. Monthly amounts anged from 2.75 inches at Blytheville in the northeastern part f the State, to 11.51 inches at Springbank in the extreme outhwestern part. From nine to eleven inches were reported rom a number of stations in the southwestern counties. Scatered showers were reported from the 8th to the 11th, and freuent to continuous rains from the 20th to the 26th, the averge number of rainy days being 9. The greatest rainfall reorted in any 24-hour period was 5.50 inches at Glenwood on e 22d and 23d. The second greatest 24-hour amount was .86 inches at Springbank on the 22d and 23d. Light snow as reported in Benton, Carroll, Boone, Washington and Johnon counties the 11th and 13th. Fayetteville reported 0.4 inch, ogers and Eureka Springs 0.2 inch.

The growing season for 1940 ended on the 12th, when the rst killing frost was reported over the entire State. The growg season this year was from April 13th to November 12th, n average of 213 days. The freezing weather the middle of e month caused only slight damage, because crops had genrally matured. Fall and winter gardens and truck crops sufered most, and there was some damage to late potatoes and urnips still in the ground. Winter grains and cover crops ere retarded by the cold weather. Normal advancement was eported at the end of the month. Harvesting operations were ractically completed during the month.

The heavy rains the latter part of the month caused a flood ondition on the Ouachita River. At Arkadelphia the crest as 18.2 feet on the morning of the 24th, which is 1.2 feet aove the flood stage. At Camden the crest was 23.7 feet on e night of the 27th-28th, or 2.3 feet below flood stage. o flood losses occurred in Clark County. In Ouachita County was estimated that the damage to matured crops amounted $500, and for the suspension of business $500. O. D. N.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock. Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena, Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

/OL. XLV   LITTLE ROCK, ARK., DECEMBER, 1940   No. 12

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents,
/ashington D. C.

GENERAL SUMMARY

December was a comparatively warm month. The average
ıonthly mean temperature for the State, based on the records
f 76 stations, was 46.7°, which is 3.8° above the mean for the
ast 50 years. It was the warmest December since 1931, and
ıe sixth warmest since 1891. Temperature departures varied
·om +6.5° at Russellville to —0.1° at Texarkana. Only one
ation had a subnormal mean temperature. The highest
ıonthly mean temperature was 51.9° at Magnolia and the low-
st was 39.8° at Lead Hill. The highest temperature recorded
uring the month was 77° at Bethesda, Independence County,
ı the 10th. The lowest was 14° at Gilbert, Searcy County,
ı the 2d and 3d. Most stations recorded their highest tem-
rature on the 9th, while the lowest occurred on the 2d or
th, at the majority of stations. Temperature extremes did
t approach the records of former Decembers. Freezing tem-
ratures occurred in all sections of the State one or more days
ıring the month. Daily mean temperatures were below nor-
al during the first three days of the month and again from
e 14th to the 18th, but comparatively mild weather prevailed
ıring the remainder of the month.

The average monthly precipitation for the State, based on
e records of 108 stations, was 3.92 inches, which is 0.30 inch
ss than the mean for the past 50 years. The greatest month-
amount was 8.69 inches at El Dorado and the least was 1.50
ches at Clinton. The greatest amount of precipitation in 24
ours was 3.10 inches at El Dorado on the 27th. The heaviest
nounts reported were recorded in the southern section of the
ate. There were 9 days with a measurable amount of rain,
hich is 1 more than average. The greater portion of the
onth's precipitation occurred from the 14th to the 16th, in-
ısive. Snowfall averaged a trace, only three stations report-
g a measurable amount. There were 13 clear, 5 partly
oudy and 13 cloudy days during the month. Fog was quite
evalent. No destructive windstorms were ıeported during
ecember.

Except for the wet period during the middle of the month,
e weather was generally favorable for outside farm work.
me of the remaining cotton and corn were gathered early in
e month. Spinach cutting and growth made good progress
the Fort Smith area. Considerable plowing and terracing
re done when weather permitted. Considerable butchering
s accomplished during the cool spells. Winter wheat, oats
d cover crops made good progress and appeared to be in good
ndition at the close of the month.

No floods occurred in the Little Rock river district during
e month. However the Ouachita River reached 21 feet at
n den on the 20th and the Petit Jean rose to 16.4 feet at
nville on the 17th. The monthly mean stage of the Arkan-
River at Little Rock was 4.6 feet, which is slightly below
mal.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana: Irons Fork, Experiment Forest, Mena Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rogers, Route 3, Rogers; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLV LITTLE ROCK, ARK., YEAR, 1940 No. 13

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The year was the second coldest of record and the coldest since 1917. The annual mean temperature was 59.3°, which is 2.1° below the mean of the past 50 years. Only October and December were warmer than average. January was unusually cold and all stations in the State recorded their lowest temperatures of the year during this month, practically all of them on the 19th. Only a few stations in the southern sections escaped subzero temperatures. The Arkansas River was completely frozen over at Little Rock for about a week during the latter part of January. May and July were also unusually cool, while December averaged considerably above normal in temperature. The other months of the year had more moderate temperature departures. Considering individual stations, the highest annual mean temperature was 63.6° at Texarkana, while the lowest was 54.5° at Lead Hill. The highest temperature recorded during the year was 104° at Gravette on August 3d; the lowest was —14° at White Rock on January 19th. These extremes are not unusual when it is considered that the State has experienced temperatures as high as 120° and as low as —29° in former years.

The total annual precipitation, based on the records of 102 stations, was 44.85 inches, which is 3.33 inches below the 50 year average, for the State as a whole. Of the 71 stations for which precipitation normals have been computed, 20 stations had more than the normal amount of precipitation. Most of these stations are located in the western, or southwestern, sections of the State. The greatest annual amount was 71.64 inches at Grannis; the least was 29.17 inches at Mountain Home. The greatest monthly amount reported from an individual station was 14.79 inches at Warren in July, while the least was 0.08 inch at De Queen in September. The greatest amount of precipitation in 24 hours was 6.60 inches at Texarkana on July 2d. Precipitation averaged above normal in April, June, July, August and November. April was the wettest month of the year, for the State as a whole, while January had the least amount of precipitation.

The snowfall totaled 9.8 inches, compared to an average of 5.5 inches during former years. Almost six inches of this total occurred in January, when snow covered the entire State during a portion of the month. Amounts at individual stations ranged from 22.1 inches at Devils Knob, to 2.5 inches at Magnolia and White Cliffs.

The first half of the year was unfavorable for vegetation and farm work, and growth and progress lagged somewhat. Generally, conditions were better during the second half of 1940. The cold weather of January and the first half of February caused some damage to fruit trees and oats. In April, unusually cold weather, with freezing temperatures and frost, caused damage to peach and apple trees. Considerable replanting of cotton, tomatoes and other tender vegetation was necessary The first three months of the year were unfavorably dry and soil moisture was insufficient for good growing conditions. Soil moisture conditions improved as a result of heavy rains in April

(Continued on page 78.)

(Continued from page 73)

and continued generally good during the summer months. Dry weather in September and October favored the maturing and harvesting of crops. The last killing frost in spring was recorded on April 13th, at most places, while the first general killing frost in autumn occurred on November 12th. The growing season averaged 213 days for the State.

There were two tornadoes during the year. The first, on April 30th, caused the death of six people and resulted in property damage of $8,000 near Saline-Grant County line. Another tornado on May 18th caused property damage of about $5,000 near Bee Branch.

B. N. W.

FLOODS IN 1940

On the Arkansas

No floods occurred on the Arkansas River during the year. Stages were low until April, when good rains caused moderate rises in the river. Moderate rises also occurred in September and November. River stages were low the rest of the year.

On the White

River stages were low during the first three months. Heavy rains on April 11th resulted in rapid rises on the Upper White. Flood stages were reached at all stations below Cotter, except Newport. The river reached 2.9 feet above flood stage at Calico Rock on the 12th. Moderate flood stages were reported at Batesville from the 12th to the 14th, at Georgetown from the 19th to May 7th, at Des Arc from the 23d to 27th, at Clarendon from the 23d to May 14th and at St. Charles from the 27th to May 17th. The river crested at 26.3 feet at Batesville on the 13th, 24.4 feet at Newport on the 15th, 22.7 feet at Georgetown on the 22d, 24.9 feet at Des Arc on the 24th, 27.8 feet at Clarendon on the 29th and 26.0 at St. Charles on the 30th. The Black River was above flood stage from April 20th to May 6th at Black Rock. Estimates on flood losses were as follows: On the Black River $1,000, Upper White $10,000 and Lower White $500. The White and Black rivers were below flood stages during the remainder of the year.

On the Ouachita

Low stages prevailed on the Ouachita until rains, during the latter part of April, caused the river to rise to 17.2 feet, or slightly above flood stage at Arkadelphia. Stages were low thereafter until November. Heavy rains from November 22d to 26th caused a crest of 18.2 feet, or 1.2 feet above flood stage at Arkadelphia on the 24th. The river was below flood stage all year at Camden.

Departures from normal temperature are computed from averages of entire period for stations having 10 or more years record. Departures of precipitation with 15 years or more record are computed from a normal or "standard mean," adjusted to a uniform 35-year period; for stations with 10 to 14 years the means are for the period to 1935, inclusive. T., less than 0.01 inch rain or melted snow. Reference letters ^{a}, ^{b}, ^{c}, appearing in the table indicate number of days missing. § Also on later dates. ‡‡Post-office addresses of these stations as follows:-Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob, Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Exp. CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI　LITTLE ROCK, ARK., JANUARY, 1941　No. 1

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

The month was somewhat warmer than average and almost 16° warmer than the exceptionally cold January of a year ago. The average monthly mean temperature for the State, based on the means of 77 stations, was 43.6°, which is 2.4° above the mean for the past 51 years. Temperature departures varied from +4.5° at Russellville to —1.4° at Blytheville. All but three stations had positive departures. The highest monthly mean temperature was 49.6° at Texarkana and the lowest was 38.0° at Lead Hill. The highest temperature recorded during the month was 76° at Booneville on the 1st. The lowest was 5° at Gravette on the 19th. The majority of stations recorded their highest temperature on the 1st, while the lowest occurred on the 19th at most stations. These extremes are well within the limits of previous years of record. Since detailed records have been kept in the State, subzero temperatures have occurred on an average of every other January, while temperatures of 80° or higher occurred almost as often. Daily mean temperatures were below normal from the 4th to the 6th, 17th to 19th and 27th to 30th, while comparatively mild weather prevailed during the remainder of the month. Sunshine averaged 47% of the possible amount, which is 3% below normal. There was no damage from high winds.

January was somewhat drier than average. The monthly precipitation for the State, based on the records of 108 stations, was 3.43 inches, which is 0.97 inch less than the mean for the past 51 years. The largest monthly amount reported from an individual station was 6.69 inches at Lutherville, and the least was 1.95 inches at Index. The greatest amount of precipitation in 24 hours was 3.03 inches at Fayetteville on the 1st. There were eight days on which 0.01 inch or more precipitation occurred. General rains occurred in most sections of the State on the 1st, 14th to 18th and 22d to 26th. The heaviest rains fell on the 1st and 23d. Practically all stations reported light snowfall during the night of the 17th and 18th. Amounts ranged from a trace to 3.6 inches at Fayetteville. The snow melted as it fell in the southern sections, while it remained on the ground 24 hours or less in the northern districts of the State. Light sleet fell at a few stations on the 6th. Thunder was heard several times during the month.

The weather, on the whole, was favorable for farm work. Considerable plowing was accomplished. Winter grains progressed favorably, and some fields were being pastured. The planting of gardens began about the middle of the month in the southern sections. Some strawberries were set out. A small amount of cotton was picked. The pruning of orchards, clearing, fencing and butchering were other important farm actiivites. Soil moisture continued adequate.

The Petit Jean was the only river in the Little Rock district to reach flood stage during the month, Danville reporting a stage of 22.1 feet on the 3d and 4th. Heavy rains on the 1st and 23d caused moderate rises in the other streams of the State.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year perio for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Pos office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation re corded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amoun recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation les than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clove Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Ther mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., FEBRUARY, 1941 No. 2

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington D. C.

GENERAL SUMMARY

February, 1941, was the coldest month of the current winter and the coldest February since 1936. The average monthly mean temperature for the State, based on the records of 76 stations, was 40.8°, which is 2.7° below the average of the past 51 years. Temperature departures varied from +0.1° at Russellville to − 6.3° at Marianna. Russellville was the only station having a positive temperature departure. Considering individual stations, the highest monthly mean temperature was 46.2° at El Dorado and Texarkana; the lowest was 36.0° at Devils Knob. The highest temperature recorded during the month was 72° at Portland on the 13th. The lowest temperature was 7° at Devils Knob on the 8th. These extremes are not unusual, considering the records of previous years. The highest temperature of the month occurred on the 11th, while the lowest was recorded on the 8th at most stations. Freezing temperatures were recorded at all stations in the State on one or more days of the month. Sunshine amounted to 48% of the possible amount, which is slightly below normal.

The month was somewhat drier than the average of previous Februarys. The monthly precipitation, based on the records of 106 stations, was 2.92 inches, which is 0.49 inch less than the average of the past 51 years. The greatest monthly amount reported from an individual station was 6.35 inches at Lutherville, and the least was 0.51 inch at Blytheville. Lutherville also reported the greatest amount of precipitation in 24 hours, 2.09 inches on the 19th. There were 8 days with a measurable amount of precipitation. Cloudiness was above average, clear days predominating during the first half of the month, while cloudy weather prevailed during the remainder of February. Precipitation was fairly general over the State on the 1st, 13th and 18th to 27th. Stations in the western sections, particularly those at higher elevations, reported the heaviest monthly totals. Precipitation was light in the northeastern sections where several stations recorded less than an inch of precipitation during the entire month. Snowfall averaged 3.4 inches, almost double the usual February amount. There was no snow in the extreme southern portion but in the central and northern counties amounts ranged from a trace to 23 inches at Lutherville. At many stations the snow melted as it fell; at a few it remained on the ground two or three days. Sleet and glaze occurred at many places from the 18th to the 24th. Glaze caused some breakage of electric wires and tree limbs in the central sections.

The rivers in the Little Rock district were below flood stage during the entire month.

February weather was unfavorable for outside farm work. During the first 17 days of the month, there were only 4 rainy days and warm and cool weather alternated at frequent intervals with trend about normal. The dry weather permitted some plowing, pruning, gardening and other activities. Some oats and lespedeza were seeded, and potatoes planted in the southern sections. After the 17th persistently cold, cloudy and wet weather halted most farm work. However, the snowfall was beneficial to winter grains and grasses, and the cold safeguarded the fruit trees from too rapid advancement. Pastures were too wet for grazing and spinach sustained some damage from freezing. As the month ended, farm work and vegetation were two or three weeks behind the normal, and warm, sunny weather was needed.

CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLVI Little Rock, Ark., March, 1941 No. 3

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

The month was cold, being the coldest March since 1931, and the seventh coldest since 1891. The average monthly mean temperature for the State, based on the records of 77 stations, was 47.5°, which is 5.1° below the average of the past 51 years. Temperature departures ranged from —2.2° at Gravette to —6.8° at Thornburg. The highest monthly mean temperature reported from an individual station was 53.4° at Magnolia, the lowest was 42.6° at Gilbert. The highest temperature reported during the month was 80° at Texarkana on the 3d, the lowest was 13° at Devils Knob on the 17th. Most stations recorded their highest temperatures on the 3d, 21st or 31st, while the lowest occurred between the 11th and 18th, the 17th being the most common date. There were about 15 mornings with freezing temperatures in the northern counties, six in the central and three in the southern. The last freeze of the month occurred on the 29th and extended well into the southern counties, 29° being recorded at Crossett. There was killing frost in some sections on the 29th, but little damage occurred since vegetation is late generally for the season. Reports from the fruit districts in the western part of the State indicated no frost damage of any consequence. Sunshine was close to normal, averaging 58% of the possible amount.

March precipitation varied widely over the State, the southern counties having ample rainfall, while amounts decreased progressively northward to less than an inch at many northern stations. The total precipitation for the State as a whole, based on the reports of 108 stations, was 2.21 inches, which is 2.40 inches less than the average of the past 51 years. This was the driest March since 1936, and the driest month since October, 1940. The greatest monthly amount reported from an individual station was 6.76 inches at Hope, and the least was 0.47 inch at Fayetteville Experiment Station Sixteen stations in the southern counties had over five inches while 25 stations in the northern half of the State recorded less than an inch. The greatest rainfall in 24 hours was 3.40 inches at Camden on the 7th. Many stations in the southern counties recorded 24-hour rainfalls of two or more inches on the 6th and 7th. There was an average of five days with a measurable amount of rain. Light snow fell in many sections of the State during the first decade. The snow was generally accompanied by sleet or rain and melted as it fell. Amounts varied from a flurry as far south as Texarkana, to 4.2 inches at Eureka Springs. In the northeastern section, where it has been dry for some time, vegetation is showing the effect of insufficient moisture. There were no tornadoes during the month and no damage from high winds.

The heavy rains in the Ouachita watershed on the 6th and 7th caused a rise in the Ouachita River to a crest of 29.5 feet on the 11th at Camden. The river was above flood stage at that point from the 9th to the 14th, but further up the river flood stages were not reached. Property loss from the flood was estimated at only $1,000, due to timely warnings and the season of the year.

March was too cold for vegetation and too wet at times in the southern sections for farm work. Spinach and gardens sustained some damage from freezing temperatures. Considerable plowing was accomplished and the planting of corn, oats, potatoes and lespedeza was in progress during the last week. Fruit buds were dormant most of the month, and pruning and spraying was done when weather permitted. As the month ended, peach and plum trees were blooming. Strawberries were blooming in the southern counties.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., APRIL, 1941 No. 4

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

The month was somewhat warmer than normal, being the warmest April since 1932. The monthly mean temperature for the State, based on reports from 77 stations, was 63.7°, which is 2.2° above the average for the past 51 years. Temperatures at individual stations ranged from +5.2° at Gravette to —0.6° at Crossett. All stations except Crossett were warmer than normal. The highest monthly mean temperature was 67.1° at Magnolia and the lowest was 59.6° at Devils Knob. The highest temperature reported during the month was 94° at Camden on the 13th; the lowest was 32° at Gilbert on the 1st and 6th. Six stations reported temperatures of 90° or higher during the month, but the freezing point was reached only at Gilbert. The highest temperatures were recorded on the 12th or 13th at most stations, while the coldest weather occurred generally on the 1st or 6th. No killing frost was observed during the month.

The total precipitation for the State during April, based on the reports of 108 stations, was 5.04 inches, which is 0.14 inch above normal. While this total was close to average for the State as a whole, amounts varied considerably in different sections of the State. The heaviest rains occurred in the western and southern sections, the least in the north-central and northeastern counties. The greatest monthly amount reported from an individual station was 10.49 inches at Gravette and the least was 1.92 inches at Gilbert. Twenty eight stations received over six inches of rain; seventeen measured less than three inches. The greatest rainfall in 24 hours was 4.96 inches at Bentonville on the 15th-16th. Considering all sections of the State, there were ten days with a measureable amount of precipitation. Sunshine amounted to 57% of the possible amount.

Heavy to excessive rains in northwestern Arkansas, Oklahoma and southern Missouri from the 15th to 18th, and in southwestern Arkansas on the 23d and 24th, resulted in flood stages on the Arkansas, Ouachita and White Rivers. Two girls were drowned in flood waters near Rogers when a bridge approach gave way. These floods caused a loss of at least $100,000, mostly to farm land and crops, and to roads. About half of this loss was sustained in the Fort Smith area and northwestern counties.

At 8:45 p. m. April 18th, a tornado was first reported about four miles southeast of War Eagle, Benton County. It traveled northeastward and was next reported near Grandview, Carroll County, 25 miles distant. The path of the storm was from one-eighth to one-fourth mile wide. At War Eagle a residence, some out buildings and orchards were damaged. The wind was more destructive near Grandview. Several chicken brooder houses were demolished and 2700 chickens killed. A stone residence and store were completely demolished and a considerable number of other buildings sustained varying amounts of damage. A man was injured seriously when the wind damaged his home. High winds and lightning destroyed several buildings near Berryville, Carroll County, on the morning of the 18th. It is estimated that these two windstorms caused property damage of at least $10,000.

On April 3d, a severe hail storm caused moderate damage to gardens and roofs in Perry and surrounding counties. Some of the hail stones were one inch in diameter.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having
or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year peri
for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †P
office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated. observations are generally made late in the afternoon, near sunset, and precipitation r
corded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amou
recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation le
than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clov
Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena
Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry,Route
Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§The
mometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No recor

CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

XLVI Little Rock, Ark., May, 1941 No. 5

e: 25 cents per year (not stamps). Remit to Superintendent of Documents, gton, D. C.

GENERAL SUMMARY

month was somewhat warmer than normal and was the est May since 1933. Considering the State as a whole, ean temperature was 71.4°, which is 2.2° above normal. temperatures at individual stations ranged from 74.4° arkana to 65.8° at Turnpike. The highest temperature ed during May was 97° at Dumas on the 21st and 22d; west was 40° at Gilbert on the 13th. The warmest weath- urred between the 21st and 23d, the coolest from the o 13th. By referring to the Comparative Data table on age it will be seen that temperatures as high as 107° and as 24° have been experienced in previous years. There n average of 14 clear, 10 partly cloudy and 7 cloudy n May. Sunshine averaged 72% of the possible amount, slightly above normal.

destructive winds were reported during the month. The t recorded wind velocity was 30 miles per hour at Little during a thunderstorm on the 23d.

, 1941, was drier than in previous years, precipitation ting to only 45% of normal. For the State as a whole, infall totaled 2.22 inches, which is 2.68 inches below the r average. The largest amount reported from an indi- station was 6.25 inches at Hope, the least was 0.31 inch at d Tree. The heaviest rainfall in 24 hours was 2.74 inches pe on the 5th. There were an average of six days with a rable amount of rain. As in previous months of the t year, stations in the northeastern sections had the least itation, several reporting less than an inch. Some sta- in Benton and Washington counties in the northwest, esha and adjacent counties in the southeast, also reported an an inch of rain. Only nine stations reported more than nches. Records from four evaporation stations show that ean evaporation in the State during May was 5.759 inches.

vy rains on the watershed of the Ouachita River resulted d stages at Camden from the 8th to 14th. The flooded ds caused some delay and damage to farm crops in Oua- Calhoun and Union counties. The lower White reached e of 26.2 feet, 0.2 feet above flood stage at Clarendon on h, and 21.5 feet, 0.5 feet above flood stage at George- on the 1st. Other streams in the Little Rock District t reach flood stage during the month.

ton planting was completed early in May and chopping earlier planted proceeded rapidly during the latter part. ights and lack of moisture delayed germination and h somewhat. Corn made good progress, on the average, although lack of moisture at times and cut-worm activity inflicted some damage. As the month ended, oats were being harvested in the southern sections and there was some cutting of wheat along the northern border. The Irish potato crop suffered considerably in the drier sections. An excellent strawberry harvest was completed during the month.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Precipitation is for the 24-hour period, midnight to midnight. [2] Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3] Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record.

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., JUNE, 1941 No. 6

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

The monthly mean temperature for the State, based on the reports from 75 stations, was 76.2°, which is 0.9° below the average for the past 51 years. Temperature departures at different stations varied from +2.1° at Harrison to —3.9° at Ozark. Twelve stations, eight of which are in the northeastern sections of the State, were warmer than normal, the remaining 63 were cooler than normal. The highest monthly mean temperature was 79.8° at Dumas, and the lowest was 71.8° at Devils Knob, Irons Fork and White Rock. The highest temperature reported during the month was 103° at Corning on the 30th, and the lowest was 47° at Lead Hill on the 16th. Nine stations reported temperatures of 100° or higher. The highest temperatures were recorded from the 23d to the 30th, while the lowest occurred on the 16th and 17th at most stations.

June precipitation, based on reports from 108 stations, averaged 4.01 inches, which is 0.05 inch below the 51 year average. However, rainfall amounts varied considerably in different sections of the State, the northeastern section again having the least rainfall, while the southwestern section again had the most. The largest amount reported from an individual station was 9.28 inches at Highland, and the least was 0.44 inch at Marked Tree. Twenty-three counties reported over four inches, of which eight counties reported over six inches. Two counties, Mississippi and Poinsett, reported less than an inch. The greatest rainfall in 24 hours was 5.04 inches at Glenwood on the 2d. The average number of days with a measurable amount of rain for the State as a whole was eight. There were twelve clear days, twelve partly cloudy and six cloudy. Sunshine was 72% of the possible amount.

Thunderstorms were reported on 24 days of the month. On June 23d, two men were killed when lightning struck a peach shed two miles east of Clarksville. Light hail was reported on four days, but caused no damage.

Heavy rainfall in Oklahoma during the first part of June resulted in flood stages on the Arkansas river as far south as Morrilton. Financial loss, mostly in crops and prospective crops, is estimated at $135,000.

As the month closed, cotton was making satisfactory progress in most sections of the State, but was at a standstill in the dry eastern and northeastern sections. Boll weevils had appeared in the southern and western counties, but only slight damage was reported. The corn crop was greatly benefited by rainfall the first of the month, and except in the dry section of the State made good progress. Harvesting of the tomato crop began in the southeastern area about the middle of the month, and by the end of the month marketing had also begun in the central and northwestern area. Fruit crops advanced normally throughout the month, and the harvesting of the earliest varieties of peaches in the southwestern area was just beginning at the end of the month.

R. D. N.

JERRY E. SCANLAN
1855-1941

Jerry E. Scanlan died at his home at Bee Branch July 11th. Mr. Scanlan was born in Cork, Ireland, came to this country in 1863, settled at Bee Branch in 1879, and served as our Cooperative Observer July 1, 1892 to July 11, 1941. For nearly half a century he kept the weather record for the love of the work. His is the longest period of service by an individual in Arkansas' Climatological History.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters a,b,c, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLVI Little Rock, Ark., July, 1941 No. 7

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Vashington, D. C.

W. E. EDMISTON
1866-1941

W. E. Edmiston, who has been our Cotton Region Observer at Portland for twenty-two years, was killed in a grade crossing accident August 17, 1941. Mr. Edmiston was born at Sidney, Ohio, December 18, 1866. He served as our Cooperative Observer from October 1, 1919 to August 17, 1941.

GENERAL SUMMARY

July, 1941, was slightly warmer than normal but almost three degrees warmer than the corresponding month of last year. The mean temperature for the State, determined from the records of 77 stations, was 81.2°, which is 0.7° above the 51-year average. Of the 52 stations for which normal temperatures have been computed, 14 had negative departures. Monthly mean temperatures ranged from 83.6° at Dumas to 76.3° at Turnpike. Nine stations, all in the mountainous western half of the State, had monthly means below 80°. The highest temperature reported from an individual station was 105° at Corning, on the 2d, and the lowest was 53° at Fayetteville Experiment Station, Irons Fork and Lead Hill on the 5th and 6th. Although most stations experienced their highest temperatures between the 5th and 7th, the first half of the month was slightly cooler than normal, while the second half averaged somewhat above normal. Sunshine was slightly above normal, averaging 71% of the possible amount.

Precipitation was heavier than the five previous Julys, for the State as a whole, and was the second wettest month of the current year. The average precipitation for 107 stations was 4.82 inches, which is 1.00 inch above the 51-year average. Amounts varied considerably over the State, 26 stations recording over six inches and eight stations measuring less than two inches. The largest amount reported from an individual station was 9.23 inches at Pine Bluff, the least was 0.80 inch at Rogers. The greatest rainfall in 24 hours was 4.18 inches at DeQueen on the 14th. Some stations in the northeast section, where the drought had become critical, received one or two good showers during the month but much more rain is needed. Generally, rainfall was the lightest in the northwest and heaviest in the southwest. There were nine days with rain for the State as a whole, compared to a normal of seven.

A severe electrical storm on the night of July 18-19 caused some damage to telephone and power lines at Stuttgart. A number of poles and transformers were damaged, interrupting service for several hours. On the same night, high winds and lightning caused about $25,000 damage at Jonesboro. Two homes and several other buildings were severely damaged by lightning and high winds. One person was injured by lightning. Four people were killed by lightning during the month; two men near Greenhill, Drew County, on the 16th; a man near Pleasant Grove, Stone County, on the 18th, and a man near Pocahontas on the 18th.

Early planted cotton began blooming early in the month but the crop was delayed at times in the northeasternsections by hot, dry weather. Boll weevils were active in the central and southwestern counties. Corn made good progress, except in the drought stricken Northeast, where much of the crop was ruined for grain and was being pulled for fodder. Where moisture was sufficient, the early corn crop was practically made by the end of the month. An unusually large peach crop was being harvested as the month ended. Late truck and gardens were being planted at the close of the month. Rice made good progress although considerable pumping was necessary at times.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a], [b], [c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLVI Little Rock, Ark., August, 1941 No. 8

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

August weather was seasonable, both in temperature and precipitation. The mean temperature for the State, determined from the records of 77 stations, was 80.7°, which is 0.6° above the 51 year average. Temperatures of 90°, or higher, prevailed in most sections until the 19th, when cooler weather afforded some relief. Warm weather was again general after the 25th. Monthly mean temperatures ranged from 84.0° at Dumas to 76.2° at Devils Knob and White Rock. Twenty stations recorded temperatures below 80° for the month. The temperature rose to 107° at Corning on the 10th, the highest reported during the month and the highest recorded in the State since September, 1939. However, in August, 1936, temperatures as high as 120° were experienced. The lowest temperature in the State during the month was 50° at Gilbert on the 20th. More than half of the stations reported temperatures of 100°, or higher, at least once during the month. Sunshine amounted to 72% of the possible amount.

The average August precipitation for the State was 3.94 inches, which is 0.37 inch above normal. Twenty-four stations reported over five inches of rain and ten reported less than two inches. For the most part, the heaviest precipitation fell in the northern and western sections, although some northeastern stations, where it had been dry, were benefited by good rains. However, soil moisture continues inadequate in some portions of the northeastern counties. The largest amount reported from an individual station was 8.63 inches at Lutherville, the least was 0.64 inch at Crossett. The greatest rainfall in 24 hours was 2.93 inches at Rogers on the 7th. There were nine days with rain, considering the entire State. The rivers in Arkansas were at low stages throughout August. Lightning damaged a barn and some fruit trees near Lutherville on the 22d.

The weather was quite favorable for the growth of crops during the month. High temperatures from the 9th to the 12th retarded crops somewhat but cooler weather following this period allowed vegetation to recover. Cotton advanced normally in most sections and open bolls were reported by the 15th, with picking getting under way during the latter part of August. Boll weevils and army worms necessitated considerable poisoning. The early corn crop was made by the latter part of the month and late cotton made good progress. Rice made good progress, early varieties heading out by the 15th and some fields being cut shortly thereafter. Watermelons, cantaloupes and peaches were being harvested early in the month. Late Irish potatoes made good progress in areas where rainfall was sufficient. As the month ended, good quantities of snap beans, apples and Concord grapes were being gathered.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries. ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

CLIMATOLOGICAL DATA

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., SEPTEMBER, 1941 No. 9

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

September was slightly warmer and wetter than normal for the State as a whole. The mean temperature was 75.4° which is 0.9° above the seasonal average. Magnolia was the warmest station, with a mean temperature for the month of 79.6°, while Devils Knob, whose temperature averaged 70.4°, was the coolest station. The majority of stations reported their highest temperatures on the first day of the month. DeQueen with a temperature of 102° on the 5th, had the highest recorded temperature during September. All stations experienced their coolest weather on the 26th and 27th, when minimum temperatures of 50° or lower were observed in most sections. The temperature dropped to 39° at Gravette on the morning of the 26th.

Precipitation totaled 3.60 inches in September for the State as a whole, which is 0.29 inch above the 51-year average. Amounts varied considerably over the State, with the western half recording the largest amounts. The largest monthly amount reported from an individual station was 8.71 inches at Mt. Ida CCC, the least was 0.07 inch at Wilson. The greatest rainfall in 24 hours was 4.75 inches at Harrison on the 24th. Most stations measured their heaviest rains on the 24th, when a tropical storm moved northward over the State from he Gulf of Mexico. Approximately one third of the stations reported over two inches of rain during the passage of this storm. The storm caused fresh to strong winds throughout the State but no damage of importance was reported. At Little Rock. the wind reached a velocity of 34 miles per hour for a five minute period, with gusts of 38 miles per hour. All sections of the State considered, there were five days with a measureable amount of rain. Many stations reported rain on only one day after the 9th of September. Sunshine was ample, averaging 71% of the possible amount. The rivers in Arkansas were well below flood stages during the entire month.

September weather was generally favorable for the growth and harvesting of crops. Early corn was being gathered durng the first two weeks. Late corn advanced normally. The howery weather during the first ten days retarded the picking of cotton, resulted in numerous cotton pests and caused some otting of bolls. After the 10th bolls opened rapidly and pickng made good progress, except for some delay by the storm of he 24th. The harvesting of early varieties of rice began durng the first part of the month, with late varieties being cut ear the close. The crop sustained some damage from high winds on the 4th and 24th. Pastures held up well for the seaon, except in the drier eastern sections. Good yields of apples and grapes were gathered. As the month ended, a few late arieties of apples remained to be picked.

B.N.W.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters [a],[b],[c], number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., OCTOBER, 1941 No. 10

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

The month was the warmest of any October in the past 51 years. The mean temperature averaged 68.2° for the State as a whole, which is 5.4° above normal. Unseasonably warm weather prevailed during the first week and again from the 19th to the 26th, with daily temperatures as much as 10° to 15° above the seasonal average. Much cooler weather overspread the State on the 27th and continued the rest of the month, with freezing temperatures at some northern stations on the 28th and 29th. Monthly mean temperatures ranged from 63.0° at Devils Knob to 74.2° at Prescott. The highest temperature in the State during October was 96° at Dumas on the 1st, and at Camden on the 8th. The lowest temperature was 28° at Eureka Springs, Gravette and Rogers on the 28th.

The average precipitation in Arkansas during October was 8.11 inches, which is 4.91 inches above the 51 year average. This was the wettest October of record, with the exception of 1919 when the rainfall totaled 10.90 inches. Precipitation at individual stations ranged from 2.87 inches at Nashville to 15.18 inches at Gravette. The heaviest rains occurred in the northwestern and north central sections. Thirty stations recorded more than ten inches of precipitation. Portland measured 6.60 inches and Arkansas City 6.00 inches during a 24 hour period on the 30-31st. Heavy rains also occurred in the State on the 16th which caused flood conditions on the Arkansas River west of Little Rock and on the White River from Batesville north. The Rivers crested at only slightly above flood stage. However, considerable bottom land along the rivers was inundated and farmers lost considerable mature crops, mostly corn and cotton. This loss in crops is estimated at $132,000.

Cotton picking was practically completed in the southern and western sections by the 15th but some remained to be picked in the northern sections at the close of the month. Harvesting in general was delayed by frequent rains and wet soil. Fall truck and pastures were in good to excellent condition at the end of the month, due to ample moisture.

Two severe tornadoes occurred in Arkansas on October 26th, killing 18 people, injuring 75, one of whom later succumbed and causing property damage of at least $200,000. At 4:00 p. m. of the 26th, a tornado was first observed at Chickala, in northern Yell County. It moved northeastward through a portion of Dardanelle to Pottsville, Pope County, a distance of about 18 miles. About 20 houses were demolished and many others considerably damaged. Four people were killed and 20 injured at Dardanelle. Property damage is estimated at $75,000. The second tornado occurred at Hamburg, Ashley County about 11:15 p. m. of the same day. Fourteen people were killed outright and 75 were injured, one fatally. Forty-two houses were completely destroyed, eleven damaged beyond repair and 53 less seriously damaged. All public utility services were disrupted for 24 hours or more. Property loss is estimated at $122,000.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used. §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1] Precipitation is for the 24-hour period, midnight to midnight. [2] Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3] Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., NOVEMBER, 1941 No. 11

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

Temperatures averaged slightly below normal in Arkansas during November. Although freezing temperatures were reported in all portions of the State several times during the month, no unusually cold weather occurred. Cool weather prevailed in most sections from the 5th to 13th and again from the 21st to 25th. Unseasonably warm weather was experienced from the 14th to 20th, with daily temperatures as much as 15° above normal. The monthly mean temperature, considering the entire State, was 49.9°, which is 1.3° below the average of past years. Monthly means ranged from 46.0° at Bee Branch to 54.6° at Magnolia. The highest temperature was 87° at Camden on the 16th, and the lowest was 18° at Gilbert, Gravette, Irons Fork and Mount Ida on the 24th and 25th.

The average precipitation in November was 2.31 inches for the State as a whole, which is 1.45 inches below normal. Amounts ranged from 1.28 inches at Osceola to 5.98 inches at Springbank. About one third of the stations reported less than two inches. The month's deficiency in rainfall was not serious since it followed unusually heavy rains in October. Snow flurries were reported several times. Light sleet fell on two days but caused no damage.

Excessively heavy rains in Arkansas and Oklahoma during the latter part of October resulted in flood conditions on the Arkansas, Black and White rivers during November. The Arkansas reached the highest point since 1838 at Fort Smith and the highest since 1935 at Little Rock. Most of the damage was sustained in the territory between Little Rock and Fort Smith. The Fort Smith area suffered severely with a portion of the city inundated. The White River did not reach unusually high stages and damage in that valley was less severe. The Arkansas River flooded approximately 185,000 acres, drove over 600 families from their homes and caused property damage of about $1,300,000. About two thirds of this loss was in feed crops such as corn, hay and silage. A large loss was also suffered from erosion and loss of top soil. Damage to highways and bridges was small but some levees were impaired. Property loss on the White River, mostly in mature crops, was $145,000.

November weather was favorable for harvesting and other outside farm operations. Bright, sunny weather predominated and there were only six rainy days. While freezing weather occurred, temperatures were not low enough to freeze the soil and prevent plowing. Harvesting of most crops was completed by the 15th, except along the river bottoms where high water prevented much work until the latter part of the month. Fall grains made good growth and stands looked favorable at the close of the month. Pastures also held up well. Some butchering was accomplished but there was not enough cold weather for this work. In most sections of the State the 1941 growing season extended from March 29th to November 10th, or 226 days without killing frost.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated. observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover: White Rock, Cass; Mulberry, Route 1, Mulberry.

Symbols for Daily Maximum and Minimum Temperatures:--Thermometers read near sunset unless otherwise indicated. ***Midnight to midnight. §§Thermometers read in the morning, maximum temperature then read is charged to the previous day on which they almost always occur. ‡‡Evaporation station. NR, No record

ARKANSAS SECTION

WALTER C. HICKMON

Vol. XLVI Little Rock, Ark., December, 1941 No. 12

Price: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

Temperatures averaged slightly above normal in Arkansas during December. Comparatively mild weather prevailed during the first five days of the month and again from the 16th to 23d. Temperatures were below the seasonal average from the 6th to the 15th, and from the 27th to the close of the month. The average monthly mean temperature for the State, based on the records of 73 stations, was 44.7°, which is 1.8° above the seasonal average of 51 years. Considering individual stations, temperatures ranged from 51.1° at Portland to 40.4° at Bee Branch and Gilbert. Temperatures averaged above normal at nearly all stations in the State. The highest temperature reported during the month was 80° at Camden on the 1st and 20th, the lowest was 14° at Gilbert on the 7th, 8th and 29th. Temperatures were well below the freezing point in all sections on several days of the month.

The average monthly precipitation for the State, based on the records of 103 stations, was 3.67 inches, which is 0.53 inch below normal. The heaviest total reported during the month was 6.62 inches at Whitecliffs, Little River County, and the least was 1.09 inches at Portland, Ashley County. Nearly half the stations reported more than four inches of precipitation, while only eight reported less than two inches. Generally, the southeastern counties received the least rainfall. Precipitation fell over most of the State on the 1st and 2d, 11th to 13th and 21st to 25th. The heaviest rains fell on the 22d when many stations measured over two inches in 24 hours. On that date 3.97 inches fell at Newport. Some snow and sleet fell in many sections of the State on the 11th. Lutherville reported a snowfall of 4.5 inches on that day. The snow remained on the ground for about one day.

Sunshine was slightly above normal for December. There were 11 clear, 8 partly cloudy and 12 cloudy days. No destructive windstorms were reported. The rivers in Arkansas were below flood stage all month. A considerable rise occurred on the White River following the heavy rains on the 22d, the river reaching 24 feet at Clarendon on the 31st, which is two feet below flood stage.

December weather was quite favorable for seasonal outdoor farm activities. Considerable plowing and terracing was accomplished. Peanut threshing, pecan harvesting, spinach cutting and butchering were some of the main activities when weather permitted. Winter grains and cover crops looked favorable at the close of the month. Soil moisture was ample in all sections.

B.N.W.

LOUIS R. KECK
1872-1941

Louis R. Keck, who had been the Cooperative Observer of the Weather Bureau at Harrison since September 1, 1931, died at his home on December 31, 1941. His 10 years of service to the Weather Bureau without compensation is greatly appreciated.

Symbols for Climatological Data Table:--The departures from the normal temperature are computed from the averages of the entire period for stations having 10 or more years of record. Departures of precipitation with 15 years or more of record are computed from a normal or "standard mean", adjusted to a uniform 35-year period for stations with 10 to 14 years the means for the period of record are used §Also on other dates. **Not used in means and summaries ‡‡Evaporation station. †Post office addresses (see notes for daily precipitation table). T. Trace, or precipitation less than 0.01 inch. Reference letters ^{a},^{b},^{c}, number of days missing.

Symbols for Daily Precipitation Table:--Except as otherwise indicated, observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at time of observation. [1]Precipitation is for the 24-hour period, midnight to midnight. [2]Precipitation measured in morning; amount recorded is for the preceding 24 hours. [3]Indeterminate. ‡Precipitation measured with recording gage. *Included in the next measurement. T. Trace, or precipitation less than 0.01 inch. ‡‡Evaporation Station. †Post Office addresses as follows:—Alum Fork Reservoir, Reform; Bethesda, Batesville; Big Lake Outlet, Manilla. Boughton, Route 4, Prescott; Clover Bend, Hoxie; Devils Knob Salus; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock: Index, Route 5, Texarkana; Irons Fork, Experiment Forest, Mena; Lutherville, Route 1, Lamar; Morrilton, Route 3, Morrilton; Rosebud, Route 2, Mt. Vernon; Springbank, Doddridge; Turnpike, Dover; White Rock, Cass; Mulberry, Route 1, Mulberry.

3 ARKANSAS SECTION

WALTER C. HICKMON

VOL. XLVI LITTLE ROCK, ARK., YEAR, 1941 No. 13

PRICE: 25 cents per year (not stamps). Remit to Superintendent of Documents, Washington, D. C.

GENERAL SUMMARY

The year was slightly warmer than normal in temperature but almost 3° warmer than in 1940. The annual mean temperature for Arkansas was 61.9°, which is 0.5° above the average of the past 51 years. March was decidedly colder than average with temperatures averaging over five degrees below normal. It was the coldest March since 1931 and the seventh coldest since 1891. Freezing weather extended into the extreme southern portions of the State on the 29th of the month. February and November were also colder than average but departures were not as great as in March. However, the coldest month of the year was February with a mean temperature of 40.8°. October had the greatest excess in temperature, the departure being over five degrees, and it was the warmest October in the past 51 years. The period from October 19th to 26th was unseasonably warm, temperatures being as much as 15° above the seasonal average on some days. During the other months of the year, average monthly temperatures departed only one or two degrees from their normals. The highest temperature reported in the State during the year was 107° at Corning on July 10th. The majority of stations reported temperatures of 100° or higher at times during the summer. No sub-zero temperatures occurred in the State during the year. The lowest temperature reported was 5° at Gravette on January 19th. Considering individual stations, Magnolia had the highest annual mean temperature with 66.1°, Devils Knob and Turnpike the lowest with an average of 57.8°.

The year was slightly drier than average for the State as a whole. The average precipitation was 46.28 inches, which is 2.31 inches below the average of the past 51 years. About one third of the stations measured over fifty inches of precipitation during the year and about one sixth of the stations less than forty inches. The least rain fell in the northeastern counties where some stations had less than half the usual amount. In that section of the State unusually dry weather prevailed during the spring and early summer. In May and June some stations in that section reported less than an inch of rain during the entire month. Considering individual stations, the largest annual amount of precipitation was 67.61 inches at Lutherville and the least was 23.18 inches at Blytheville. The greatest amount of precipitation measured in one month was 15.18 inches at Gravette in October and the least was 0.07 inch at Wilson in September. The greatest rainfall in 24 hours was 6.60 inches at Portland on October 31st, during the passage of a tropical storm northward over the State.

Snowfall averaged 4.2 inches during the year for the State, compared with an average annual fall of 5.5 inches. Amounts ranged from 28.1 inches at Lutherville to none at several stations in the extreme southern section of the State. Sleet and glaze were observed at many places in the State from February 18th to 24th. The glaze caused some breakage of electric wires and tree limbs in the central section.

Two severe tornadoes occurred in the State on October 26th, one in the vicinity of Dardanelle, Yell County, the other at

(Continued on page 78)

(Continued from page 73)

Hamburg, Ashley County. These two tornadoes killed 18 people, injured 75 and caused property damage in excess of $200,000. Of the two tornadoes, the one at Hamburg was much more severe, since it destroyed 42 houses and damaged 53 other dwellings. A less severe tornado occurred in Benton and Carroll counties on April 18th. One person was injured and several buildings demolished at War Eagle, Benton County and Grandview, Carroll County.

A severe electrical storm on the night of July 18-19 caused some damage to electric lines in central sections of the State. On the same night high winds and lightning resulted in about $25,000 property damage at Jonesboro. Two homes and several other buildings were severely damaged by lightning and high winds.

The year was favorable for the growth of crops, except in the northeastern section of Arkansas. Spring farm operations were late getting started due to cold, wet weather in March. Crops in the northeastern counties received a severe setback in May and June due to droughty conditions. Considerable corn was ruined for grain and had to be pulled for fodder. An excellent strawberry crop was harvested in White County in May. Good crops of watermellons, cantaloupes and peaches were harvested in August. The cotton crop was good, although flooded river bottoms in October and November resulted in some delay and loss. Considerable corn, hay and forage crops were ruined in lowlands in the Arkansas and White River Valleys by the November floods. In most sections of the State the 1941 growing season, that is the period between the last killing frost in spring and the first killing frost in autumn, extended from March 29th to November 10th. This makes a growing season of 226 days, which is slightly longer than an average season.

FLOODS IN 1941

Arkansas River

Flood stages occurred on the Arkansas River in April, June, October and November. The river reached a stage of 31.4 feet at Ft. Smith on April 22d, but, farther down the river, crests were only slightly above flood stage. Flood stages occurred again in June from Morrilton west. In October, moderate flood stages caused some loss to farmers in loss or damage to mature crops in the bottom lands. The worst flood of the year occurred early in November when the river reached unusually high stages from Little Rock west. Approximately 185,000 acres were inundated, causing a large loss in mature crops and some damage to levees and bridges.

White River

Moderate flood stages occurred on the White River at Batesville and Newport in April, and at Clarendon and St. Charles in May. Moderate flood stages were reported again in October from Batesville north. The highest stages of the year occurred in November, when a considerable acreage of mature crops was covered with water.

Ouachita River

The Ouachita River was at moderate flood stages on March 11th and again during the latter part of April. Heavy rains in May forced the river to 17 feet at Arkadelphia on the 9th and 32 feet at Camden on the 11th. The river was below flood stage during the remainder of the year. These spring rises occasioned some loss to farmers in the valley, since it was necessary to replant some crops in the lowlands.

Red River

The Red River was in flood for several days during the middle of June. Most of the property loss was in prospective crops, about 10,000 acres of lowlands near Index being inundated.

Final Estimate of Flood Losses during 1941

Arkansas River................	$2,224,500
White River	329,600
Ouachita River	12,000
Red River	100,000
Total....................	$2,666,100

*Indicates freezing temperature, no killing frost reported.

Departures from normal temperature are computed from averages of entire period for stations having 10 or more years record. Departures of precipitation with 15 years or more record are computed from a normal or "standard mean," adjusted to a uniform 35-year period; for stations with 10 to 14 years the means are for the period to 1935, inclusive. T., less than 0.01 inch rain or melted snow. Reference letters a, b, c, appearing in the table indicate number of days missing. § Also on later dates. †Post-office addresses of these stations as follows: Alum Fork Reservoir, Paron; Beaty Lake, Forest City; Bethesda, Batesville; Big Lake Outlet, Manilla; Boughton, Route 4, Prescott: Camp Chaffee, Fort Smith; Camp Marion, Route 1, Little Rock; Clover Bend, Hoxie; Corley, Paris; Devils Knob, Salus; Eagle Gap, Eagleton; Eleven Point, Route 1, Ravendon Springs; Fordyce, Route 1, Fordyce; Fort Smith Water Plant, Mountainburg; Green Mountain, Calico Rock; Hon, Waldron; Index, Route 5, Texarkana; Irons Fork, Exp.
